

Quality Management System

Checklist

Essential Quality Assurance

www.eqa.com.au

Freedom,
Accountability,
Culture.

Thank you for downloading the eQA checklist.

This checklist is to be used in identifying what you do and do not have documented and working within your business. When we meet with potential clients, we often find that they already have a lot of the requirements for a QMS. We then make sure that they are being applied in an effective way.

Once you have worked through this checklist, you may wish to then move on to our “7 Step Quality Management System – Kick Off Pack”. This is also available as a free download.

Using the Checklist

Work through the checklist, identifying if you have formalised or documented processes in place. Answer Yes or No to the questions. If you answer Yes then record where that process is documented and working within your business. Where you have answered No this will give you a guide as to what you need to do to further improve your business.

Please note: This is not a formalised Quality Management System.

A Quality Management System will make a big difference to any business

How Can a QMS Help Your Business?

- Open the doors to government contracts and working with major organisations (e.g. sub-contracting, supplier)
- Enable you to work with international businesses (e.g. export)
- Help gain grants and potential investors
- Enable you to formalise your business practices
- Gain ISO 9001 certification
- Give your customers peace of mind
- Give your business a competitive edge

What Problems Can a QMS Solve?

- Reduction in customer complaints, product returns
- Reduction of waste in your business
- Gives a business owner more time to work on the business
- Defines roles and responsibilities at all levels
- Removes reliance on the business owner
- Succession Planning (e.g. handing over to family members, selling the business)

Company Name:		Date:	
Industry:			

Business Area	Requirements	Yes/No	Evidence Examples
